

## Stage 1 - Comments submission

Lock date: 11-07-2014 10:25:10

### 2013 Evaluation of FCT Research and Development Units

#### Comments submission

After notification of the results of the first stage of evaluation, the units that are recommended to proceed to the second stage are given an additional opportunity of responding to the comments of the evaluation panels. These comments are optional and should be limited to clarification of misunderstandings or to correcting factual errors in the reports.

This must be done within 10 working days after the communication of the results.

#### Do you wish to record any comments?

*(If you don't want to submit comments, you may leave this form empty or unlocked)*

Yes

#### Comments

*The comment will only be considered valid if locked within the 10 working day period.*

The Referee's comments have a mistake on page 2 (B. Scientific and technological merit of the research team), about the LAETA Researchers H-index , precisely in the sentence :  
" Less than 6% of the Researchers have a H-index larger than 10".  
The correct version should read as:  
" Less than 23% of the Researchers have a H-index larger than 10".  
Our comment is limited to correct the error because a significant number, 58 LAETA researchers, 23%, have H-index larger than 10.
